

# Tracking Day & Night

Continuous Tracking For 150 Hours

Model: CT-24  
GPS/GPRS Vehicle/Personal Tracker

## Price

**\$899.00**

## Overview

This miniature unit is a REAL TIME GPS TRACKER which allows you to locate its EXACT position at anytime, accurate to within a couple of metres!

Other GPS trackers can only tell you where the unit has been PREVIOUSLY..... Our unit tells you its location RIGHT NOW, at anytime!!!!

The unit is the size of 2 matchboxes and comes with a weatherproof rubber case and super magnet to allow easy attaching to the underside of any vehicle.

## How It Works

Just place a SIM Card into the unit and make a phone call! The unit will instantly send you a text message to your mobile phone with its EXACT Latitude and Longitude, accurate to within a couple of metres. The package includes mapping software which allows you to see where the unit is on a Street Directory style map!

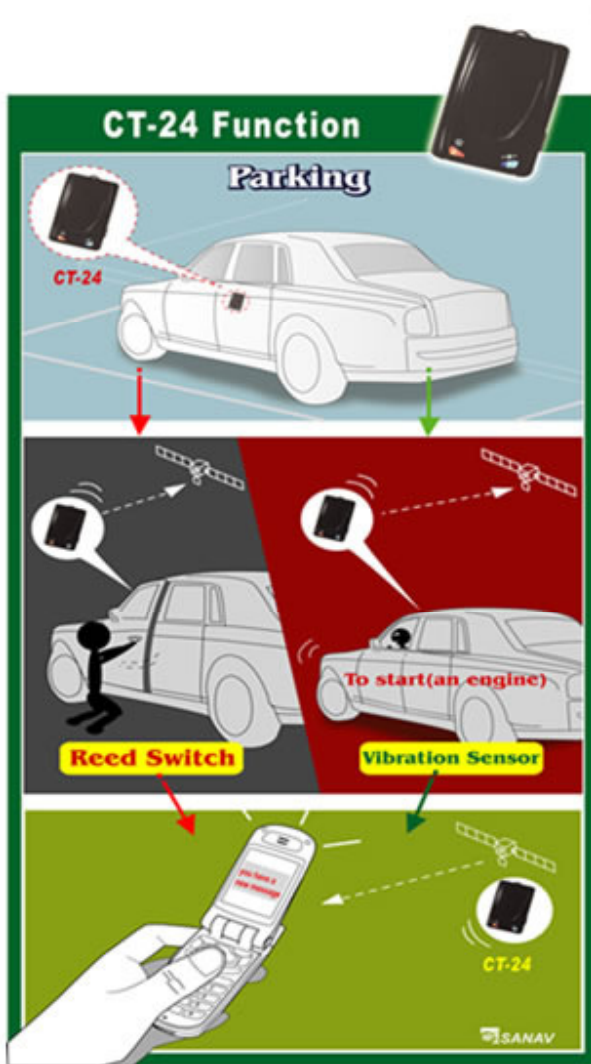

The unit is specially designed for long battery operation time (150 hours), after which time you simply recharge the unit and place it back on the vehicle. The high GPS and GSM sensitivities allows the unit to function underneath a vehicle without any external antennae. Vibration sensor and reed switches also come with the unit.

## Features

- Compact size
- High GPS and GSM sensitivity
- Send position via SMS
- Vibration sensor and reed switch are available
- Programmable auto report
- Polling current GPS position in active mode
- Power saving mode and active mode are selectable
- Configuration can be done via an application software or SMS
- Long battery operation time of more than 150 hours.
- Digital Street Directory Mapping Software

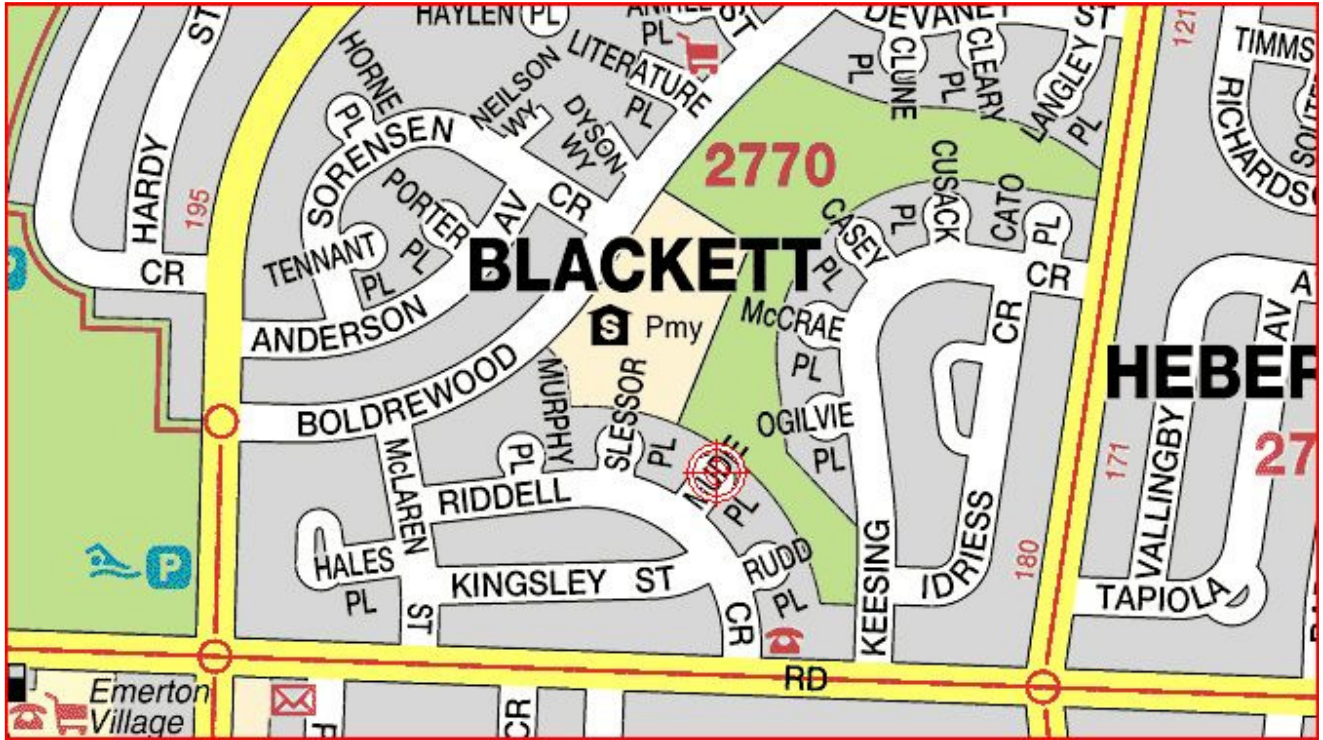

## Applications

- Vehicle Tracking
- Asset /Container Tracking
- Personal Tracking
- Pet Tracking
- Covert Tracking

## [Street Directory Style Mapping Software](#)

This package comes with state of the art street directory style mapping software which allows you to see where your GPS is at anytime as a target marked on a standard UBD or Gregory's street map, as shown:

For further information on the GPS Tracking Unit, or to purchase this product, please do not hesitate to contact our office at anytime.

## SPECIFICATIONS

### GPS Receiver

Chipset	SIRFIII
Datum	WGS-84
Sensitivity	-159db
Reacquisition	<0.1s
Hot	1s typical
Warm	38s typical
Cold	42s typical

### GSM Transceiver

Frequency	GSM 900/1800/1900 MHz or GSM 850/1800/1900 MHz
-----------	---

### General

Antenna	Internal GSM antenna and active GPS patch antenna	
External Power Supply	5.0 ~ 8.0V DC with charging current of 500mA	
Battery Power Supply	3.7V DC	
Battery Capacity	1800mA Li-ion battery	
Battery Operation	>150 hours (1800mA battery with one report per hour)	
Dimension	64.66 x 43.19 x 27.70mm (with a 1800mA battery)	
Weight	92g (with a 1800mA battery)	
I/O	2 x 3.3V I/O available	
Environment	Operation Temperature	-5°C ~ 55°C
	Storage Temperature	-5°C ~ 55°C
